## Medium-Term Management Plan 2023 and Sustainability

In 2017, the Daigas Group formulated a Long-Term Management Vision that looks toward FY2031.3, aiming to be "an innovative energy and service company that continues to be the first choice of customers" and achieve carbon neutrality by 2050.

In our Medium-Term Management Plan 2023, "Creating Value for a Sustainable Future," announced in 2021, we have adopted a backcasting approach from our long-term vision in formulating our plan. Our aim is to create "value for a sustainable future" together with our stakeholders and continue to grow as a corporate group that creates value that contributes to solving social issues, with the goal of achieving a sustainable society.

In formulating the Medium-Term Management Plan 2023 (Plan 2023), in addition to introducing ROIC as a management indicator, we newly identified important aspects (materiality) for the acceleration of ESG management and set each indicator. Please refer to P.20-21 for the results of the key performance indicators related to materiality.

## ■ Medium- to Long-term Management Indicators

			FY2024.3 Targets	FY2031.3 Targets	FY2051.3 Targets	Striving to achieve
Profitability indicators	ROIC*1		Nearly 5%	Nearly 7%*2		carbon neutrality by 2050  In light of the growing demands of
