

Protection of Personal Information

Principle and Outline

The Daigas Group believes that information is an important asset for a company and should be properly managed to prevent leakage or loss, and it has established a system for the proper use and management of personal information received from customers. Furthermore, we are working to enhance risk management regarding personal information by utilizing our risk self-assessment system, G-RIMS, and to raise employee awareness through e-learning and training programs.

Privacy Policy

In accordance with the Act on the Protection of Personal Information, our Rules for Personal Information Protection, and other related regulations, Osaka Gas has established a privacy policy regarding the handling of information on its customers, shareholders and other parties and posted it on its official website. Based on this policy, we strive to properly protect information on our customers, shareholders, and other parties. In addition, we handle personal information on our employees, etc. in the same manner as customer information. We are making the privacy policy regarding personal information of our employees, etc. known through the internal portal site and striving to properly protect the personal information on our employees, etc.

Protection of Personal Information

Establishing a personal information protection system that includes subcontractors in its scope

The Daigas Group, which handles a large amount of personal information, has established rules and implemented various security control measures to protect such information. We are striving to properly manage and prevent leakage of personal information by establishing a personal information protection system that includes subcontractors in its scope, in which the Representative Director and Executive Vice-President responsible for the General Affairs Department serves as the Chief Privacy Officer and managers are assigned to the Business Units, the Human Resources Department and affiliated companies.

Strengthening risk management through training and e-learning programs

Every year, the Daigas Group strengthens risk management regarding personal information by utilizing its risk self-assessment system, G-RIMS, and addresses personal information protection as an important theme in compliance training and other educational programs to raise employee awareness. Furthermore, all employees and temporary employees who have access to computers provided by the Group are required to take e-learning courses on information security, which consists of basics and case studies. We ensure that employees further deepen their understanding of personal information protection by, for example, regularly sharing information regarding personal information loss and leakage incidents.

Personal Information Protection System
