

Human Resources Development

Principle and Outline

The Daigas Group aims to become a group of companies at which all employees can find personal growth through their work. We have introduced a career-course-specific human resources systems designed to respect and put to full use the individuality and autonomy of employees, and we have been conducting a wide range of training. Overseas business training is also provided to develop personnel who can play an active role globally. Furthermore, we have introduced an employee evaluation system that is highly objective based on the Management by Objectives (MBO) method, as well as a system that allows employees to take on the challenge of voluntary career development.

Personnel System

Personnel system to develop human resources according to their roles

For the steady growth and development of the company, Osaka Gas has introduced a career-course-specific personnel system in which roles and expectations are clearly defined for all employees and employees are appropriately employed, fostered, evaluated and assigned according to each role. Under this personnel system, employees themselves conduct course registration.

Outline of the Personnel System

Training System

Career-course-specific training

To enable employees to play an active role in their respective courses, Osaka Gas systematizes training and conducts training sessions in a planned manner to have participants acquire abilities required for each career course.

Meister Course

This course is designed to foster business professionals who achieve high performance through their extensive business experience and outstanding skills and who contribute to business performance by passing on their skills and know-how. Employees systematically acquire required skills and know-how according to the nature of their work at the human resource development center established at each business unit.

Management Course

This course is designed to develop future managers and supervisors who will manage operations based on their wealth of work experience and leadership skills and to promote organizational vitality and the development of subordinates. Selective training sessions and other programs are provided to enhance management and leadership skills.

General Course

This course is designed to develop human resources who will lead an organization based on a wide range of work experience, including management, while taking on staff duties, such as strategic planning for the business unit and the Daigas Group as a whole. We have an in-house business school for learning the knowledge and skills that form the basis of strategic planning, such as logical thinking, marketing, accounting and finance.

Specialist Course

This course is designed to foster specialists who will draft strategies for the business unit and the Daigas Group with a high level of expertise to help with decision-making and realization of such strategies. In addition to the in-house business school for the General Course, we provide in-house study sessions, etc. to learn advanced expertise in each business field.

Training for young employees

Osaka Gas positions the first three years after employees join the company as a period for nurturing young employees and encourages them to form their foundations as members of society.

After acquiring basic conduct and attitudes as a member of society through introductory training at the time of employment, each employee receives follow-up training every year to enhance the abilities required at each stage of growth. For the same period, an instructor assigned to each newly hired employee provides guidance on work to promote further growth.

Training for young employees

Training system for the Daigas Group

To enhance the Daigas Group's human resource development support measures, we offer systematized training programs that are highly requested by group companies. In addition to programs for all job levels, the system is designed to encourage self-directed career development and personal growth by providing self-development support programs.

Outline of the Training System for Daigas Group

	Managerial skills booster program Purpose: To develop in managerial candidates an understanding of managerial skills and aid in their acquisition			
	Newly appointed instructor training			
Junior/ new employees	Mid-career training			
	Newly hired employee training			

Developing Global Human Resources

To support the growth of its overseas businesses, Osaka Gas dispatches approximately 100 employees from Japan to local subsidiaries in approximately seven countries. We focus on developing leaders who can collaborate with local stakeholders and drive business from a global perspective.

Since October 2025, we have offered internal internship programs with overseas placements, and "Yume-Deca Nation" programs to subsidize the costs for short-term overseas study programs and certification programs, providing employees with more opportunities for overseas experiences and supporting their acquisition of qualifications.

Employee Performance Evaluation and Interviews

Aiming for evaluations that lead to growth

Osaka Gas is using performance evaluation, which measures the degree of performance based on the Management by Objectives (MBO) method. Starting from FY2026, we have introduced a "performance-based pay" system in which remuneration fluctuates annually based on performance evaluations, creating a system that enables more appropriate and timely evaluation of outstanding contributions to business performance. While enhancing opportunities for meetings between supervisors and subordinates, we clarify each employee's strengths and areas for improvement, and supervisors give appropriate advice, leading to each employee's skill development.

In performance evaluation, in which employees set their own goals, we encourage them to take on even more aggressive challenges by appropriately evaluating not only results but also processes in the course of work.

Furthering Employees' Careers at Osaka Gas

Creating a system that encourages employees to take on challenges on their own initiative

Osaka Gas provides an opportunity for all employees to have a self-observation interview once a year, in which each employee reflects on the satisfaction and performance of his or her current job, proactively draws up desired mid- to long-term career plans, and expresses his or her desired career path, etc. By taking into consideration the opinions and wishes of each employee obtained through these interviews, we are able to make decisions on assignments and other matters, thereby raising awareness of the need for employees to shape their careers on their own.

We have a Challenge System in place that allows employees to choose the work that they are interested in or want to do from among internally advertised jobs, encouraging employees to seek career development on their own accord. A total of more than 280 employees have been reassigned through this system since FY1989, when it was launched.

Support for self-development

We offer Challenge Seminar Training Courses (approximately 100 courses per year) for all Daigas Group employees, allowing them to acquire advanced business skills at their discretion. In addition, to improve the skills of employees, we encourage them to take various correspondence training and education courses by subsidizing a portion of the fees for these courses. Also in October 2025, we enhanced our support for obtaining qualifications to promote long-term career development and self-development, and also introduced a recurrent leave system to enable employees to pursue studies for a specific period.

Supporting the improvement of field operations skills

In order to provide safe and reliable products and services to our customers, the Daigas Group provides technical training for employees in the management of LNG terminal facilities, gas supply pipe installation and safety inspections, and equipment installation and repair.
