

Financial Report for FY2014.3 (April 2013 – March 2014)

April 2014
Osaka Gas Co., Ltd.

I. Business Results for FY2014.3 and Forecasts for FY2015.3

Management information is available on Osaka Gas websites.

Financial reports, annual reports and road show materials can be accessed and downloaded at the following URL.

http://www.osakagas.co.jp/ir/index_e.html

Disclaimer

Certain statements contained herein are forward-looking statements, strategies and plans, which reflect our judgment based on the information so far available. Actual results may differ materially from those discussed in such statements. Among the factors that could cause actual results to differ materially are: economic trends in Japan, sharp fluctuations in exchange rates and crude oil prices and extraordinary weather conditions.

Note regarding gas sales volume

All gas sales volumes are indicated based on the standard heating value at 45 MJ/m³.

Note regarding consolidated gas sales volume

The fiscal year of Nabari Kintetsu Gas, Toyooka Energy, and Shingu Gas ends on December 31.

Thank you very much for taking time to attend this briefing on our business result report.

I would also here like to express, on behalf of the Company, my gratitude for your continued cooperation and understanding in regard to the Company's businesses.

Today, I would like to explain Osaka Gas operational results for the year ended March 31, 2014 and forecasts for the year ending March 31, 2015.

Summary of Business Results for FY2014.3 - I

Year-on-Year Comparison

■ Overview

Consolidated Net sales	Increased to ¥1,512.5 billion, up 9.6% from the previous year due mainly to the rise in gas sales price based on the fuel cost adjustment system, along with the rise in LNG price
Consolidated Ordinary income	Increased to ¥106.0 billion, up 17.7% from the previous year due mainly to decrease in operating expenses of gas business and increase in profit of electricity business. Loss on fuel cost adjustment system was ¥20.5 billion (compared with a loss of ¥20.7 billion the previous year)
Consolidated Net income	Decreased to 41.7 billion yen, down 20.5% from the previous year due to recognition of an impairment loss in upstream business in US.
■ Gas Sales Volume	
Residential	Decreased by 3.3% to 2,198 million m ³ due to higher temperatures of the air and water from the previous year
Commercial, public and medical	Decreased by 0.8% to 1,528 million m ³
Industrial	Increased by 2.5% to 4,329 million m ³ due to our marketing effort to develop new demand
■ Others	
Dividend	Plan to increase the annual dividends by ¥0.5 per share (Annual dividend of ¥9 per share)

Design Your Energy 夢ある明日を

OSAKA GAS

3

In the year ended March 2014, we reported increases in both net sales and ordinary income, but decrease in net income.

Consolidated net sales increased by 9.6% from the previous year to ¥1,512.5 billion, mainly due to higher gas sales price, adjusted in response to increases in the LNG price.

Consolidated ordinary income increased by 17.7% from the previous year to ¥106.0 billion, mainly due to decrease in operating expenses of gas business and increase in profit of electricity business.

Consolidated net income decreased by 20.5% from the previous year to ¥41.7 billion, mainly due to the recognition of an impairment loss in the US upstream business.

Residential gas sales volume decreased by 3.3% to 2,198 million m³ due to higher temperatures of the air and water from the previous year.

Gas sales volume for commercial/public/medical use were almost same as the previous year to 1,528 million m³.

Industrial gas sales volume increased by 2.5% to 4,329 million m³, due to our marketing effort to develop new demand.

We plan to increase annual dividends for the year ended March 2014 by ¥0.5 from the previous year, to ¥9 per share.

Summary of Business Results for FY2014.3 - II

Comparison with forecasts

■ Overview

Consolidated Net sales	Almost same as the forecasts, at ¥1,512.5 billion
Consolidated Ordinary income	Increase to ¥106.0 billion, up 6.0% from the forecasts due to an increase in profits mainly from the electricity business and affiliated companies despite the increase of loss on the fuel cost adjustment system Loss on fuel cost adjustment system was ¥20.5 billion (compared with a loss of ¥10.9 billion of the forecast)
Consolidated Net income	Increase to ¥41.7 billion, up 17.5% from the forecasts due to recognition of the gain on sales of investment securities

■ Gas Sales Volume

Residential	Increased by 0.7% to 2,198 million m ³ from the forecasts
Commercial, public and medical	Increased by 2.8% to 1,528 million m ³ from the forecasts due to lower-than-expected air and water temperature and smaller-than-expected energy savings
Industrial	Decreased by 0.5% to 4,329 million m ³ from the forecasts

■ Others

Investments for expansion, greenfield, M&A	Invested ¥142.8 billion in total for acquisition of interest in an activated carbon business, participation in water business in UK, construction of gas pipeline and overseas upstream business.
--	---

Now, I would like to explain the results for the year ended March 2014, in comparison with the revised forecasts announced in December.

Consolidated net sales were almost same as the forecasts.

Consolidated ordinary income was 6.0% higher than forecasts, mainly due to the increase in the profit from electricity business and affiliated companies, while loss on fuel cost adjustment increased by approximately 10 billion yen.

Gas sales volumes to residential and industrial customers were almost same as the forecasts.

Gas sales volume to commercial/public/medical use were 2.8% higher than the forecasts due to lower temperature of the air and water than forecasts and smaller-than-expected energy savings by customers.

The total investments for expansion, greenfield, M&A during the year ended March 2014 were ¥142.8 billion due to acquisition of interest in an activated carbon business and participation in water business in UK, etc.

Design Your Energy 夢をかなる明日を

The financial position and key financial indicators are shown in this slide.

Net worth increased from the previous year by ¥51.1 billion, to ¥798.9 billion because a certain portion of retained earnings for the current year was capitalized and foreign exchange adjustments accounts increased.

Capital expenditures increased by ¥11.1 billion from the previous year to ¥124.1 billion, mainly because of the progress of upstream projects and construction of LNG careers.

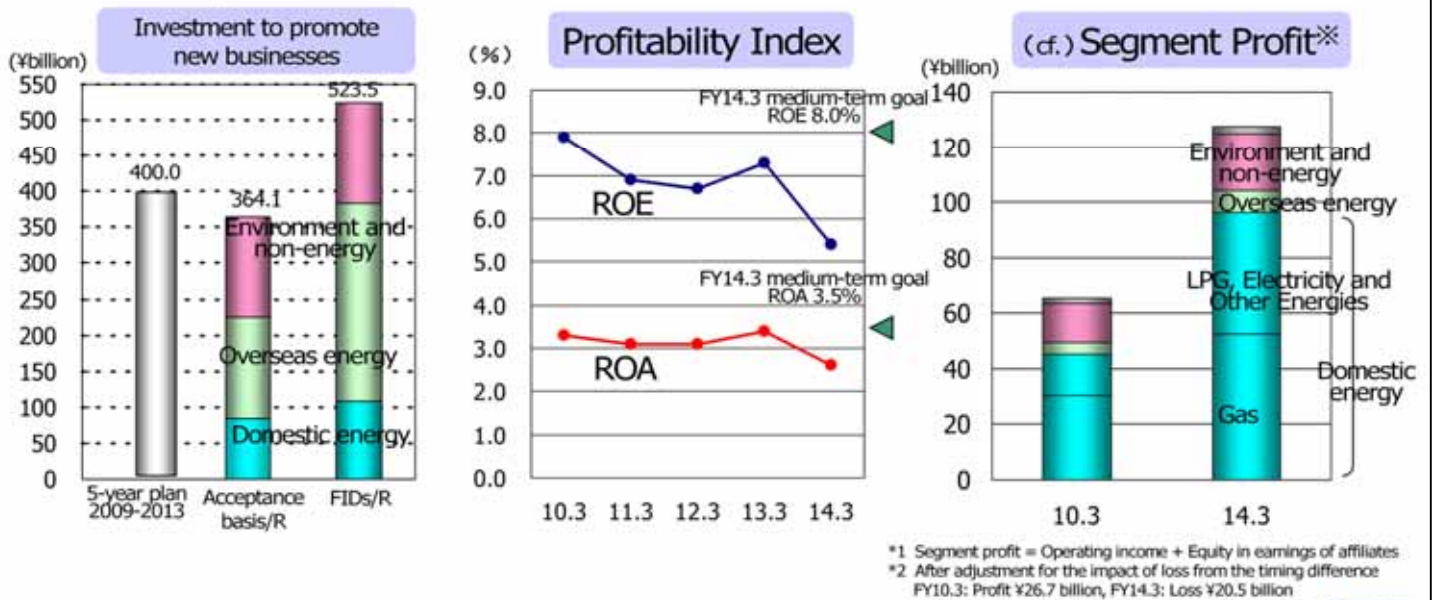

ROA decreased by 0.9 points to 2.6%. ROE also decreased by 1.9 points from the previous year, to 5.4%.

Progress of Mid-term plan(FY10.3-FY14.3)

■ Overview

We made steady efforts toward future growth in the Domestic Energy business, International Energy business, and Environment and Non-Energy businesses.

We failed to achieve the target ROA and ROE because of the recorded impairment losses in overseas upstream businesses

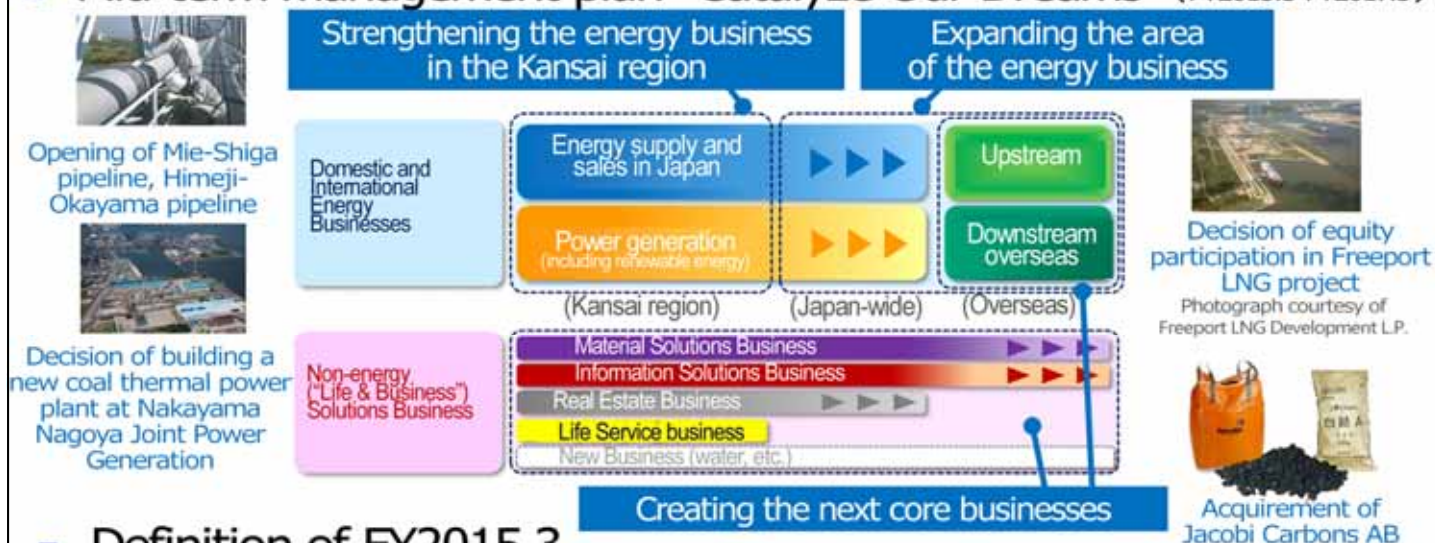

The year ended March 2014 was the final year of the phase 1 of our long-term vision and medium-term business plan, Field of Dreams 2020 announced in 2009.

During the past five years, we made steady efforts toward future growth in the Domestic Energy business, International Energy business, and Environment and Non-Energy businesses.

However, as we recorded impairment loss in upstream businesses in the U.S., we failed to achieve the profitability targets for FY2014.3: ROA 3.5%, ROE 8.0%.

Priority themes in new mid-term plan and FY2015.3

■ Mid-term management plan "Catalyze Our Dreams" (FY2015.3-FY2017.3)

■ Definition of FY2015.3

- (1) to accelerate its efforts to expand existing businesses in growing markets by taking advantage of economic recovery
- (2) to further advance its energy business in accordance with the direction of electricity and gas industry regulatory reforms
- (3) to take the first firm step to realize the vision of the group as a first year of new mid-term business plan

Strengthening the gas business

Establishing the next core business

Creating a more solid business foundation

Under our new mid-term management plan, Catalyze Our Dreams, announced in March 2014 as a plan for the next phase, we will focus on Strengthening the energy business in the Kansai region, Expanding the area of the energy business, and Creating the next core businesses.

We regard the year ending March 2015, the initial year of the plan, as a year both to accelerate our efforts to expand businesses in the growth markets by taking advantage of economic recovery and to strive to further develop the energy business by taking into account the reform of the electricity and gas businesses.

Therefore, we will focus on strengthening the gas business, establishing the next core businesses, and improving the business foundation this fiscal year.

Summary of Business Forecasts for FY2015.3

■ Overview

Consolidated net income	Expected to increase by 6.1% to ¥1,605.5 billion, reflecting increases in gas sales price and LNG sales price, in response to LNG purchase price increase.
Consolidated ordinary income	Expected to decrease by 5.7% to ¥100.0 billion, reflecting an increase in operating expenses and a decline in profits from the electricity business and affiliated companies. Profit on fuel cost adjustment system is expected to be ¥4.7 billion. (compared with a loss of ¥20.5 billion the previous year)
Consolidated net income	Expected to increase by 57.0% to ¥65.5 billion

■ Gas Sales Volume

Residential	Expected to increase by 0.8% to 2,215 million m ³ , assuming same temperature level as in usual years.
Commercial	Expected to decrease by 4.4% to 1,461 million m ³ , assuming same temperature level as in usual years and reflecting impact of customers' energy-saving consciousness.
Industrial	Expected to decrease by 0.7% to 4,296 million m ³ . Due to the expiry of PPA of IPP, the classification of gas used is changed from non-regulated to self-use. Expected to increase in real term, reflecting newly created demand and increased operation of customers' facilities, approximately 70 million m ³ .

■ Others

Investments for expansion, greenfield, M&A	Plans for ¥112 billion investments, mainly in international energy business.
--	--

OSAKA GAS

10

We would like to explain the specifics of business forecasts in the year ending March 2015.

In the year ending March 2015, we expect increases in both net sales and net income, but decrease in ordinary income.

Consolidated net sales are expected to increase by 6.1% from the previous year to ¥1,605.5 billion, reflecting increases in the gas sales price and LNG sales price, in response to LNG purchase price increase.

Consolidated ordinary income is expected to decrease by 5.7% to ¥100 billion, reflecting an increase in depreciation due to the completion of the Mie-Shiga pipeline and the Himeji-Okayama pipeline and a decrease in profits from the electricity business and affiliated companies, while loss on fuel cost adjustment system turned into profit.

Residential gas sales volume is expected to increase by 0.8% to 2,215 million m³ from the previous year, assuming same temperature level as in usual years.

Gas sales volume for commercial/public/medical use is expected to decrease by 4.4% to 1,461 million m³, adjusted by the same temperature impact on residential use and reflecting the influence of customers' energy-saving consciousness.

Although Industrial gas sales volume is expected to decrease by 0.7% to 4,296 million m³, the sales volume is expected to increase in real term excluding the effect of the change in the classification of gas used from non-regulated to self-use due to the expiry of PPA of IPP.

We will actively continue investments for expansion, greenfield and M&A. Investments of ¥112 billion are planned.

Gas Sales Volume Forecasts for FY2015.3

45MJ/m ³	A. FY15.3 forecasts	B. FY14.3 results	A-B	A-B/B(%)
Number of meters installed (thousand)	7,162	7,136	+27	+0.4%
Installation of new meters (thousand)	99	102	-3	-3.3%
Monthly gas sales volume per household (m ³ /month)	31.4	31.3	+0.1	+0.4%
Residential use	2,215	2,198	+17	+0.8%
Commercial, public, and medical use	1,461	1,528	-67	-4.4%
Industrial use	4,296	4,329	-32	-0.7%
Non-residential total	5,758	5,856	-99	-1.7%
Wholesale	479	469	+10	+2.1%
(non-regulated)	(4,929)	(4,988)	(-59)	(-1.2%)
Non-consolidated gas sales volume total (million m ³)	8,452	8,524	-72	-0.8%
Consolidated gas sales volume total (million m ³)	8,483	8,554	-72	-0.8%

This table is a summary of forecasts for gas sales volumes in the year ending March 2015.

We expect that gas sales volume on a non-consolidated basis will decrease by 0.8% to 8,452 million m³.

Forecasts for FY2015.3 - I

Figures in () are ratios of consolidated results to non-consolidated results

ROE	8.2%	5.4%	+2.8
EPS (yen/share)	31.5	20.0	+11.4
BPS (yen/share)	395.9	383.9	+12.0

FCF = Cash flows from operating activities - capital expenditures for upgrading existing businesses

Design Your Energy 夢をかなる明日を

 OSAKA GAS

13

Forecasts for items in the assets and liabilities section and key financial indicators are shown in this slide.

Interest-bearing liabilities will increase by ¥86.8 billion from the previous year to ¥660.4 billion, since we must satisfy the cash requirement for the investments to promote new businesses.

Capital expenditures are expected to be at the same level as the previous year to ¥128.0 billion, mainly for use in constructing the power plant and in developments in upstream business.

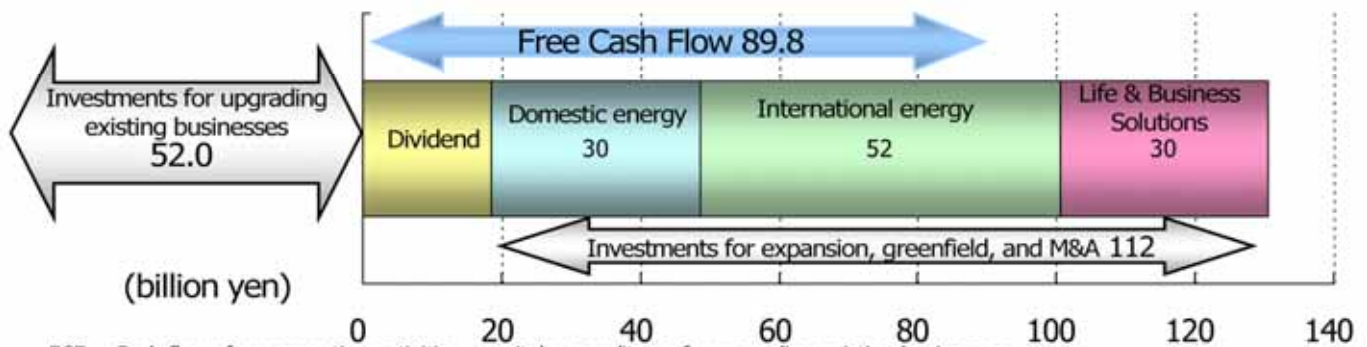

ROA and ROE are expected to increase to 3.8% and 8.2%, respectively, from the previous year.

Use of Free Cash Flow for FY2015.3

- FCF for FY 2015.3 is expected to be ¥89.8 billion, down ¥23.3 billion from the previous year
- Plans to make ¥112 billion investment for expansion, greenfield, and M&A

Domestic energy	Construction of power plant, etc.
International energy	Upstream business and construction of LNG carriers, etc.
Life & Business solutions	Acquisition of real estate properties, etc.

- Aims to achieve an annual dividend of ¥9 per share, following FY 2014.3.

FCF = Cash flows from operating activities - capital expenditures for upgrading existing businesses.
 The amount of investment differs from that of capital expenditures, as the former includes both capital expenditures and investments / financing.
 <Classification of the Renewable Energy business> Environment and Non-Energy segment till FY2014.3; Classified into Domestic Energy segment or International Energy segment from FY2015.3 according to the nature of the business.
 <Change of segment name> The name of Environment and Non-Energy segment will be changed to Life & Business Solutions segment from FY 2015.3

Finally, I will explain the use of free cash flow.

Free cash flow for the year ending March 2015 is expected to be ¥89.8 billion.

We will plan to invest a total of ¥112 billion in expansion of new businesses, which will be covered by free cash flow and borrowings.

A little less than half of these investments in expansion of new businesses will be appropriated to investment in overseas energy business.

We will plan to mainly invest in overseas upstream development projects in which we have already decided to participate and the construction of LNG carriers.

In addition, we will construct a new coal thermal power plant at Nakayama Nagoya Joint Power Generation in the Domestic Energy Business and acquire real estates in the Life & Business Solutions.

We plan to pay annual dividends per share of 9 yen for the year ending March 2015, the same as the previous year.

That's all for my presentation on the operational results for the year ended March 2014 and forecasts for the year ending March 2015.

II. Facts and Figures

Topics in FY2014.3 I

- Completion of Mie-Shiga pipeline, Himeji-Okayama pipeline
 - Outline of Mie-Shiga pipeline (joint project with Chubu Electric)

Section	Yokkaichi City, Mie Prefecture (Chubu Electric Yokkaichi Thermal Power Plant) to Taga Town, Inukami County, Shiga Prefecture (Osaka Gas Taga Governor Station)
Distance/ Specifications	Approximately 60 km / Design pressure: 7 MPa, Diameter: 600 mm
Completion	January 30, 2014
The completion of the gas pipeline enables Osaka Gas to receive gas from Chubu Electric, improving the reliability of the city gas supply.	

- Outline of Himeji-Okayama pipeline

Section	Himeji City, Hyogo Prefecture to Okayama City, Okayama Prefecture
Distance/ Specifications	Approximately 86 km / Design pressure: 7 MPa, Diameter: 600 mm
Completion	March 27, 2014
The completion of the gas pipeline enables Osaka Gas to offer energy solutions to customers between Himeji and Okayama. Osaka Gas agreed with Kansai Electric to supply natural gas to Kansai Electric's Aioi Power Plant No.1 and No.3 units from FY2017.3.	

Topics in FY2014.3 II

■ Construction of a new coal thermal power plant adjacent to Nagoya Power Plant (announced in Mar.)

- Nakayama Nagoya Joint Power Generation* has decided to construct a new biomass-coal mixture combustion thermal power plant adjacent to its Nagoya Power Plant under operation (power generation capacity: 149 MW, coal thermal).

* Main shareholders: Gas & Power (Osaka Gas wholly-owned subsidiary) 95%,
Nakayama Steel 5%

- Overview of the plan

Capacity	110 MW
Fuel	Coal, woody biomass, kerosene (combustion aid)
Launch	Second half of FY2017.3 (Scheduled)
Location	Nakayama Nagoya Joint Power Generation Adjacent to Nagoya Power Plant (Taketocho Town, Chita County, Aichi Prefecture)

Location

- In addition to gas thermal and renewable energy, on which we have been focusing, we will strengthen our electricity business by constructing a new coal thermal power plant to expand our range of available power sources.

Topics in FY2014.3 III

■ Agreement for equity participation in Freeport LNG project (announced in Feb.)

■ Overview of Freeport LNG project

Location	Freeport, Texas, USA
Launch of project	2018(scheduled)
LNG production capacity	three trains each with 4.4 million tons /year

- We will make an equity investment of 25%, in the liquefaction subsidiary of Freeport LNG for its liquefaction business of the first train in the Freeport project to produce 4.4 million tons per annum.
We plan to invest approximately US\$ 600 million.

+/- signs indicate impact on profit.

FY14.3 results → FY15.3 forecasts (differences)

106.0

100.0

(-6.0)

(billion yen)

Osaka Gas: -1.6

Subsidiaries: -4.3

Gross margin of gas sales +17.7
 • Profit/loss on fuel cost adjustment system +25.2
 • Volume change, etc. -7.5

Increase in operating expenses -10.4
 • Increase in depreciation costs -5.6
 • Increase in miscellaneous expenses -3.9

Profit of other sales -6.1
 • Profit of incidental business (electricity business profit, etc.) -3.5
 • Gas appliance sales profit -1.3

Non-operating income and expenses -2.9

Jacobi Carbons AB* -1.3
 IPPs in US -1.2
 OGIT (LNG vessel leasing) -1.1

* The operator of an activated carbon business acquired in January 2014
 Impacts on consolidated income, including goodwill depreciation and increases of temporary expenses due to the step-up of inventories (increases due to mark-to-market evaluation) are reported.

Residential Gas Sales

FY2014.3 results

	YoY change	Remarks
Number of customers	+0.5%	
Influence of temperature	- 3.0%	Average annual temperature: 17.1 degrees Celsius (16.7 degrees Celsius in FY2013.3)
Others	- 0.7%	
Total	- 3.3%	

FY2015.3 forecasts

- Residential gas sales volume is expected to increase from the previous year by 17 million m³ (up 0.8% YoY) to 2,215 million m³, assuming that temperatures will be the same as usual years and will become lower than the previous year.

Commercial Gas Sales

FY2014.3 results

	YoY change	Remarks
Demand development	+1.4%	
Impact of temperature / number of days	+0.2%	
Others	- 2.3%	Increased/Decreased in operation of customers' facilities and customer's energy-saving consciousness, etc.
Total	- 0.8%	

FY2015.3 forecasts

- Commercial gas sales volume is expected to decrease by 67 million m³ (down 4.4% YoY) to 1,461 million m³, assuming that temperatures will be the same as usual years and customers will make energy-saving efforts.

Industrial Gas Sales

FY2014.3 results

	YoY change	Remarks
Demand development	+2.3%	Shift to gas from other fuels, etc.
Increase/decrease of operating rates	+0.2%	
Total	+2.5%	

Breakdown by sectors (45MJ, million m³)

	Volume	Percentage to total sales volume	Y-o-Y
Machinery	349	8.1%	92.8%
Metal	1,015	23.5%	100.5%
Glass	337	7.8%	100.4%
Chemical	1,228	28.4%	105.3%
Food	518	12.0%	99.7%

FY2015.3 forecasts

- Industrial gas sales volume is expected to decrease by 32 million m³ (down 0.7% YoY) to 4,296 million m³. Due to the expiry of PPA of IPP, the classification of gas used is changed from non-regulated to self-use. Expected to increase in real term, reflecting newly created demand and increased operation of customers' facilities.

Monthly Gas Sales for FY2014.3

Change from the same month the previous year (%)

	Apr.	May	Jun.	Jul.	Aug.	Sep.	Oct.	Nov.	Dec.	Jan.	Feb.	Mar.	Total

Risk Factors for Annual Earnings Results Forecast

- Atmospheric and water temperatures
 - A 1 degree Celsius change in atmospheric and water temperatures will affect the residential gas sales volume: increase/decrease of approx. 5% in spring and autumn, approx. 6% in summer, and approx. 4% in winter.
- Crude oil prices
 - LNG prices are linked to crude oil prices. A \$1/bbl. change in crude oil prices will have an effect of approx. 1.2 billion yen on annual ordinary income.
- Foreign exchange rate
 - LNG prices are affected by fluctuations in the US\$/JPY exchange rate. A 1 yen fluctuation in the US\$/JPY exchange rate will have an effect of approx. 1.4 billion yen on annual ordinary income.
- Materials costs
 - Although the materials cost adjustment system allows us to reflect changes in materials costs in gas rates in the medium- and long-term, an increase in materials costs is likely to affect business results due to a time lag in reflecting cost fluctuations, and also depends on the composition of materials suppliers.
- Interest rate
 - A 1% change in the interest rate will have an effect of approx. 700 million yen on annual consolidated non-operating expenses.
